IDWR Plans Water Measurement Workshop

Officials from the Idaho Department of Water Resources will conduct a one-day workshop on April 6 in Stanley to discuss the issues surrounding installation of controlling works and measuring devices in Water District No. 170.

The workshop will be conducted at the Mountain Village Hotel conference from 10 a.m. until approximately 3 p.m., with a 45-minute lunch break.

The workshop is primarily intended for water users who must comply with IDWR's Feb. 20, 2007, order requiring controlling works and measuring devices in Water District No. 170, but is open to other water users as well.

Topics will include an overview of the order, controlling works design, water measurement for closed conduit and open channel, and special considerations in Water District No. 170. Representatives from several land management agencies will attend and be available to address pertinent questions.

For additional information about the workshop, contact Christine Roberts at 208-287-4800 or by email at Christine.Roberts@idwr.idaho.gov. Anyone with a disability should contact IDWR by April 3 to make arrangements.

The Mountain Village Hotel is located at the intersection of State Highway 75 and State Highway 21 in Stanley.
